## SUMMARY

Python developer and AI-focused data science practitioner with hands-on experience in machine learning, data analysis, and applied problem-solving. Skilled in building ML workflows, analyzing datasets, debugging systems, and working with real-world pipelines. Strong interest in AI systems, backend engineering, automation, NLP, cybersecurity, and scalable intelligent applications.

## TECHNICAL SKILLS

- Programming: Python, SQL, OOP Concepts
- Data Science & ML: Pandas, NumPy, Scikit-learn, Machine Learning, Model Evaluation, Feature Engineering, EDA
- Visualization: Matplotlib, Seaborn, Data Visualization
- Tools & Platforms: Git, GitHub, Jupyter Notebook, Linux
- Backend & Learning: FastAPI Basics, APIs, Automation Concepts
- Systems & Security: Computer Networks, Cybersecurity Fundamentals

## EXPERIENCE

### Data Science Intern – Hoping Minds, Mohali (Jan 2024 – Jun 2024)

- Cleaned and processed datasets and improved workflow efficiency
- Built analysis pipelines and improved preprocessing quality
- Mentored peers in Python and debugging practices
- Worked on practical ML and data handling tasks

### Cybersecurity Simulation Trainee – Mastercard (Nov 2023)

- Designed phishing detection scenarios and explored vulnerabilities
- Achieved 100% simulation score
- Improved understanding of security and human-factor risks

### Crew Leader & Trainer – Burger King, Moga

- Managed operations and trained 15+ employees
- Developed leadership and decision-making skills

## PROJECTS

### AI Code Risk Analyzer | Python, AI, Security Concepts

- AI-assisted project focused on identifying risky coding behavior and secure development concepts

### Plagiarism Detection Tool | Python, NLP, Scikit-learn

- Built semantic similarity system for plagiarism detection beyond keyword matching

### MGR'S Complete | Python, Automation

- Structured workflow and automation-oriented Python project

### Wine Quality Prediction | Python, Pandas, Scikit-learn, Random Forest, SVM

- Built predictive ML models and evaluated performance

### House Price Prediction | Python, Regression, Visualization

- Regression model with feature analysis and visualization

## EDUCATION

B.Tech in Computer Science – Shaheed Bhagat Singh Technical Campus

Expected Completion: 2026

Relevant Coursework: Cybersecurity, Computer Networks, Databases

## **TECHNICAL INTERESTS**

- AI Reliability & Model Behavior
- Applied Machine Learning & Automation
- Backend APIs & Intelligent Systems
- Cybersecurity & Secure Systems

## **LEADERSHIP & ACTIVITIES**

- NCC Cadet (Sergeant Rank)
- Team leadership and mentoring experience
- Football player and digital editing enthusiast
